

LAVENDRA KUMAR RAJPUT

Senior SDET | QA Automation Lead | Agentic AI & Intelligent Test Automation

Delhi NCR, India | +91-7982787511 | Lavendra.rajputc1@gmail.com
LinkedIn: linkedin.com/in/lavendra | GitHub: github.com/lkumarra

PROFESSIONAL SUMMARY

Senior SDET with **7.5+ years** of experience designing and scaling test automation across UI, API and performance layers for SaaS, telecom and AI-driven products. At Netomi, built an **AI-powered auto-healing test automation framework** and achieved **90% automation coverage** using **Claude Code** and **agentic AI** workflows. Expert in Playwright (TypeScript), Selenium (Java), RestAssured and Pytest, with strong CI/CD, Docker and AWS experience. Proven record of leading QA teams, owning test strategy, and applying LLMs, MCP servers and prompt engineering to accelerate test creation, maintenance and defect triage.

SKILLS

Agentic AI & GenAI: Claude Code, Agentic AI Workflows, AI Agents, MCP Servers, Playwright MCP, LLMs (Claude, OpenAI GPT), LangChain, RAG, Prompt Engineering, GitHub Copilot
AI in Testing: Auto-Healing Automation, AI Test Generation, AI Failure Triage, Conversational AI Testing
UI Automation: Playwright, Selenium WebDriver, Protractor, Cucumber (BDD), TestNG, Pytest, POM
API Testing: RestAssured, Playwright API, Karate, Postman, Python Requests, JSON Schema Validation
Languages: Java, TypeScript, JavaScript, Python, SQL
CI/CD & Cloud: Jenkins, GitHub Actions, Docker, Kubernetes, Selenium Grid, AWS (S3), Git, Maven
Performance: Apache JMeter
Databases: MySQL, MSSQL, PostgreSQL, MongoDB, Redis, Elasticsearch
Observability & Reporting: Kibana, OpenSearch, Grafana, Prometheus, Allure, ExtentReports, JIRA
Practices: Test Strategy, Shift-Left Testing, Agile/Scrum, BDD, Root Cause Analysis, UAT, Mentoring

KEY ACHIEVEMENTS

- **90% automation coverage** at Netomi with an AI-powered auto-healing framework
- **100% REST API automation** delivered at Monotype with Playwright + Jenkins
- Early adopter of **AI-assisted QA:** Claude Code, Playwright MCP, Copilot, OpenAI
- Frameworks in **Java, TypeScript, Python and C#**; 60+ public GitHub repos

EXPERIENCE

Netomi Nov 2025 – Present

Senior SDET, Gurgaon, India

- Drive quality engineering for Netomi's **agentic AI customer-experience platform**, owning UI and API automation strategy across releases.
- Architected an **AI-powered auto-healing test framework** that detects broken locators and failing steps and repairs them automatically, reducing flaky tests and maintenance effort.
- Achieved **90% test automation coverage**, significantly cutting manual regression effort and accelerating release cycles.
- Use **Claude Code** as an agentic coding assistant to generate, refactor and review test scripts, page objects and API tests.
- Built **agentic AI workflows** combining LLMs and **MCP servers** for test-case generation, failure root-cause analysis and smart defect triage.
- Validate LLM-driven conversational AI agent flows and run automated suites in CI/CD for continuous feedback on every build.

Celsior Technology Dec 2024 – Oct 2025

Module Lead QA, Noida, India

- Led end-to-end QA automation across UI and API using **Playwright (TypeScript)**; owned test strategy, framework design and code reviews.
- Mentored QA team members on framework best practices, automation standards and AI-assisted development.

- Used **Playwright MCP Server with GitHub Copilot** to generate and maintain automation scripts through agentic workflows.
- Automated test data generation and technical documentation using **OpenAI APIs / ChatGPT**.

TELUS Digital

Aug 2024 – Dec 2024

Senior Quality Assurance Analyst, Noida, India

- Automated REST API test suites using **Playwright (TypeScript)** and maintained Jenkins CI pipelines.
- Debugged production incidents through log analysis in **Kibana / OpenSearch**, driving root cause analysis with developers.
- Conducted UAT demos with business stakeholders to secure release sign-off.

Monotype Solutions

Apr 2023 – Aug 2024

Senior SDET, Noida, India

- Delivered **100% automation coverage for REST APIs** using Playwright (TypeScript).
- Designed **JMeter** performance test scripts to benchmark API throughput and response times.
- Integrated automated suites into Jenkins CI/CD pipelines for continuous regression testing.

Deutsche Telekom Digital Labs

Dec 2021 – Apr 2023

SDET, Gurgaon, India

- Developed UI automation with **Selenium (Java)** and API suites with **RestAssured and Karate**.
- Implemented BDD using Cucumber; tracked defects in JIRA and ran suites via Jenkins.

SOTI Inc.

Apr 2021 – Nov 2021

SDET, Gurgaon, India

- Automated APIs using Java HTTP Client with SQL-based backend validations; led feature demos for stakeholders.

Capgemini

Mar 2019 – Apr 2021

Senior Software Engineer, Noida, India

- Built UI and API test suites with Protractor, Selenium and RestAssured; developed internal utilities to speed up automation.

PROJECTS

Playwright Automation Framework (TypeScript, Playwright, Node.js) – Unified UI + API framework with Page Object Model, custom fixtures, typed API client, parallel cross-browser runs, CI retries and HTML reports.

github.com/lkumarra/playwright-automation

Selenium Test Automation Framework (Java, Selenium, TestNG, Docker) – Cross-browser POM framework with Selenium Grid, retry analyzer, Excel data-driven tests, PostgreSQL and AWS S3 integration, ExtentReports, Jenkins and Docker. github.com/lkumarra/Selenium_Framework

Library API Test Framework (Python, Pytest, Requests) – Generates API test cases automatically from HAR files; multi-environment YAML config, session management and HTML reports. github.com/lkumarra/library-api-test-framework

BDD & Multi-Language Frameworks (Protractor, Cucumber, Python, C#) – Protractor BDD and POM, BestBuy API BDD (RestAssured + Cucumber), Python Selenium (Pytest) and Selenium .NET frameworks. github.com/lkumarra

EDUCATION

B.Tech, Electronics & Communication Engineering, Raj Kumar Goel Institute of Technology (AKTU), Ghaziabad

2018
